

Dear Sirs;Please reject the NAB's petition 04-160. I like my satellite radio just the way it is and I find the traffic and weather information very usefull. I willing pay for this service and I like what it has to offer. The public air ways are filled with commericals and lack the news content I find so usefull on satellite radio. I also enjoy hours of uniterrupted music which the public air waves cannot provide. Let the listeners of satellite radio determine what they want to hear - after all we are the ones paying for the service.

Thank you.
